

**Company: Sistemi Sospensioni S.p.a.**

**Business Line: MAGNETI MARELLI SHOCK ABSORBERS**

**Company Description:** Sistemi Sospensioni S.p.A. is a company of the Magneti Marelli Group, dedicated to the design and production of suspension components, suspension modules, and shock absorbers. It is based in Turin and it is also present in Poland and in Brazil as well as in Italy. Regarding the shock absorbers, the available products cover a wide range of automotive applications, from the passive shocks to the electronically controlled shocks. The innovation, design, development and testing skills are capable of satisfying the customers' most demanding technical specifications. The high production verticalisation ensures a mastery of all technological processes employed in the construction of shock absorber components. Consequently, the in-depth knowledge of materials and processes guarantees a high level of quality. The Shock Absorbers innovation team is dedicated to the design of the new-to-the-world automotive shock absorbers, with a special focus on mechatronic products aiming at increasing performance and sustainability of vehicles.
